Company For Insulations & Contracting

Profile  
**TADMUR**

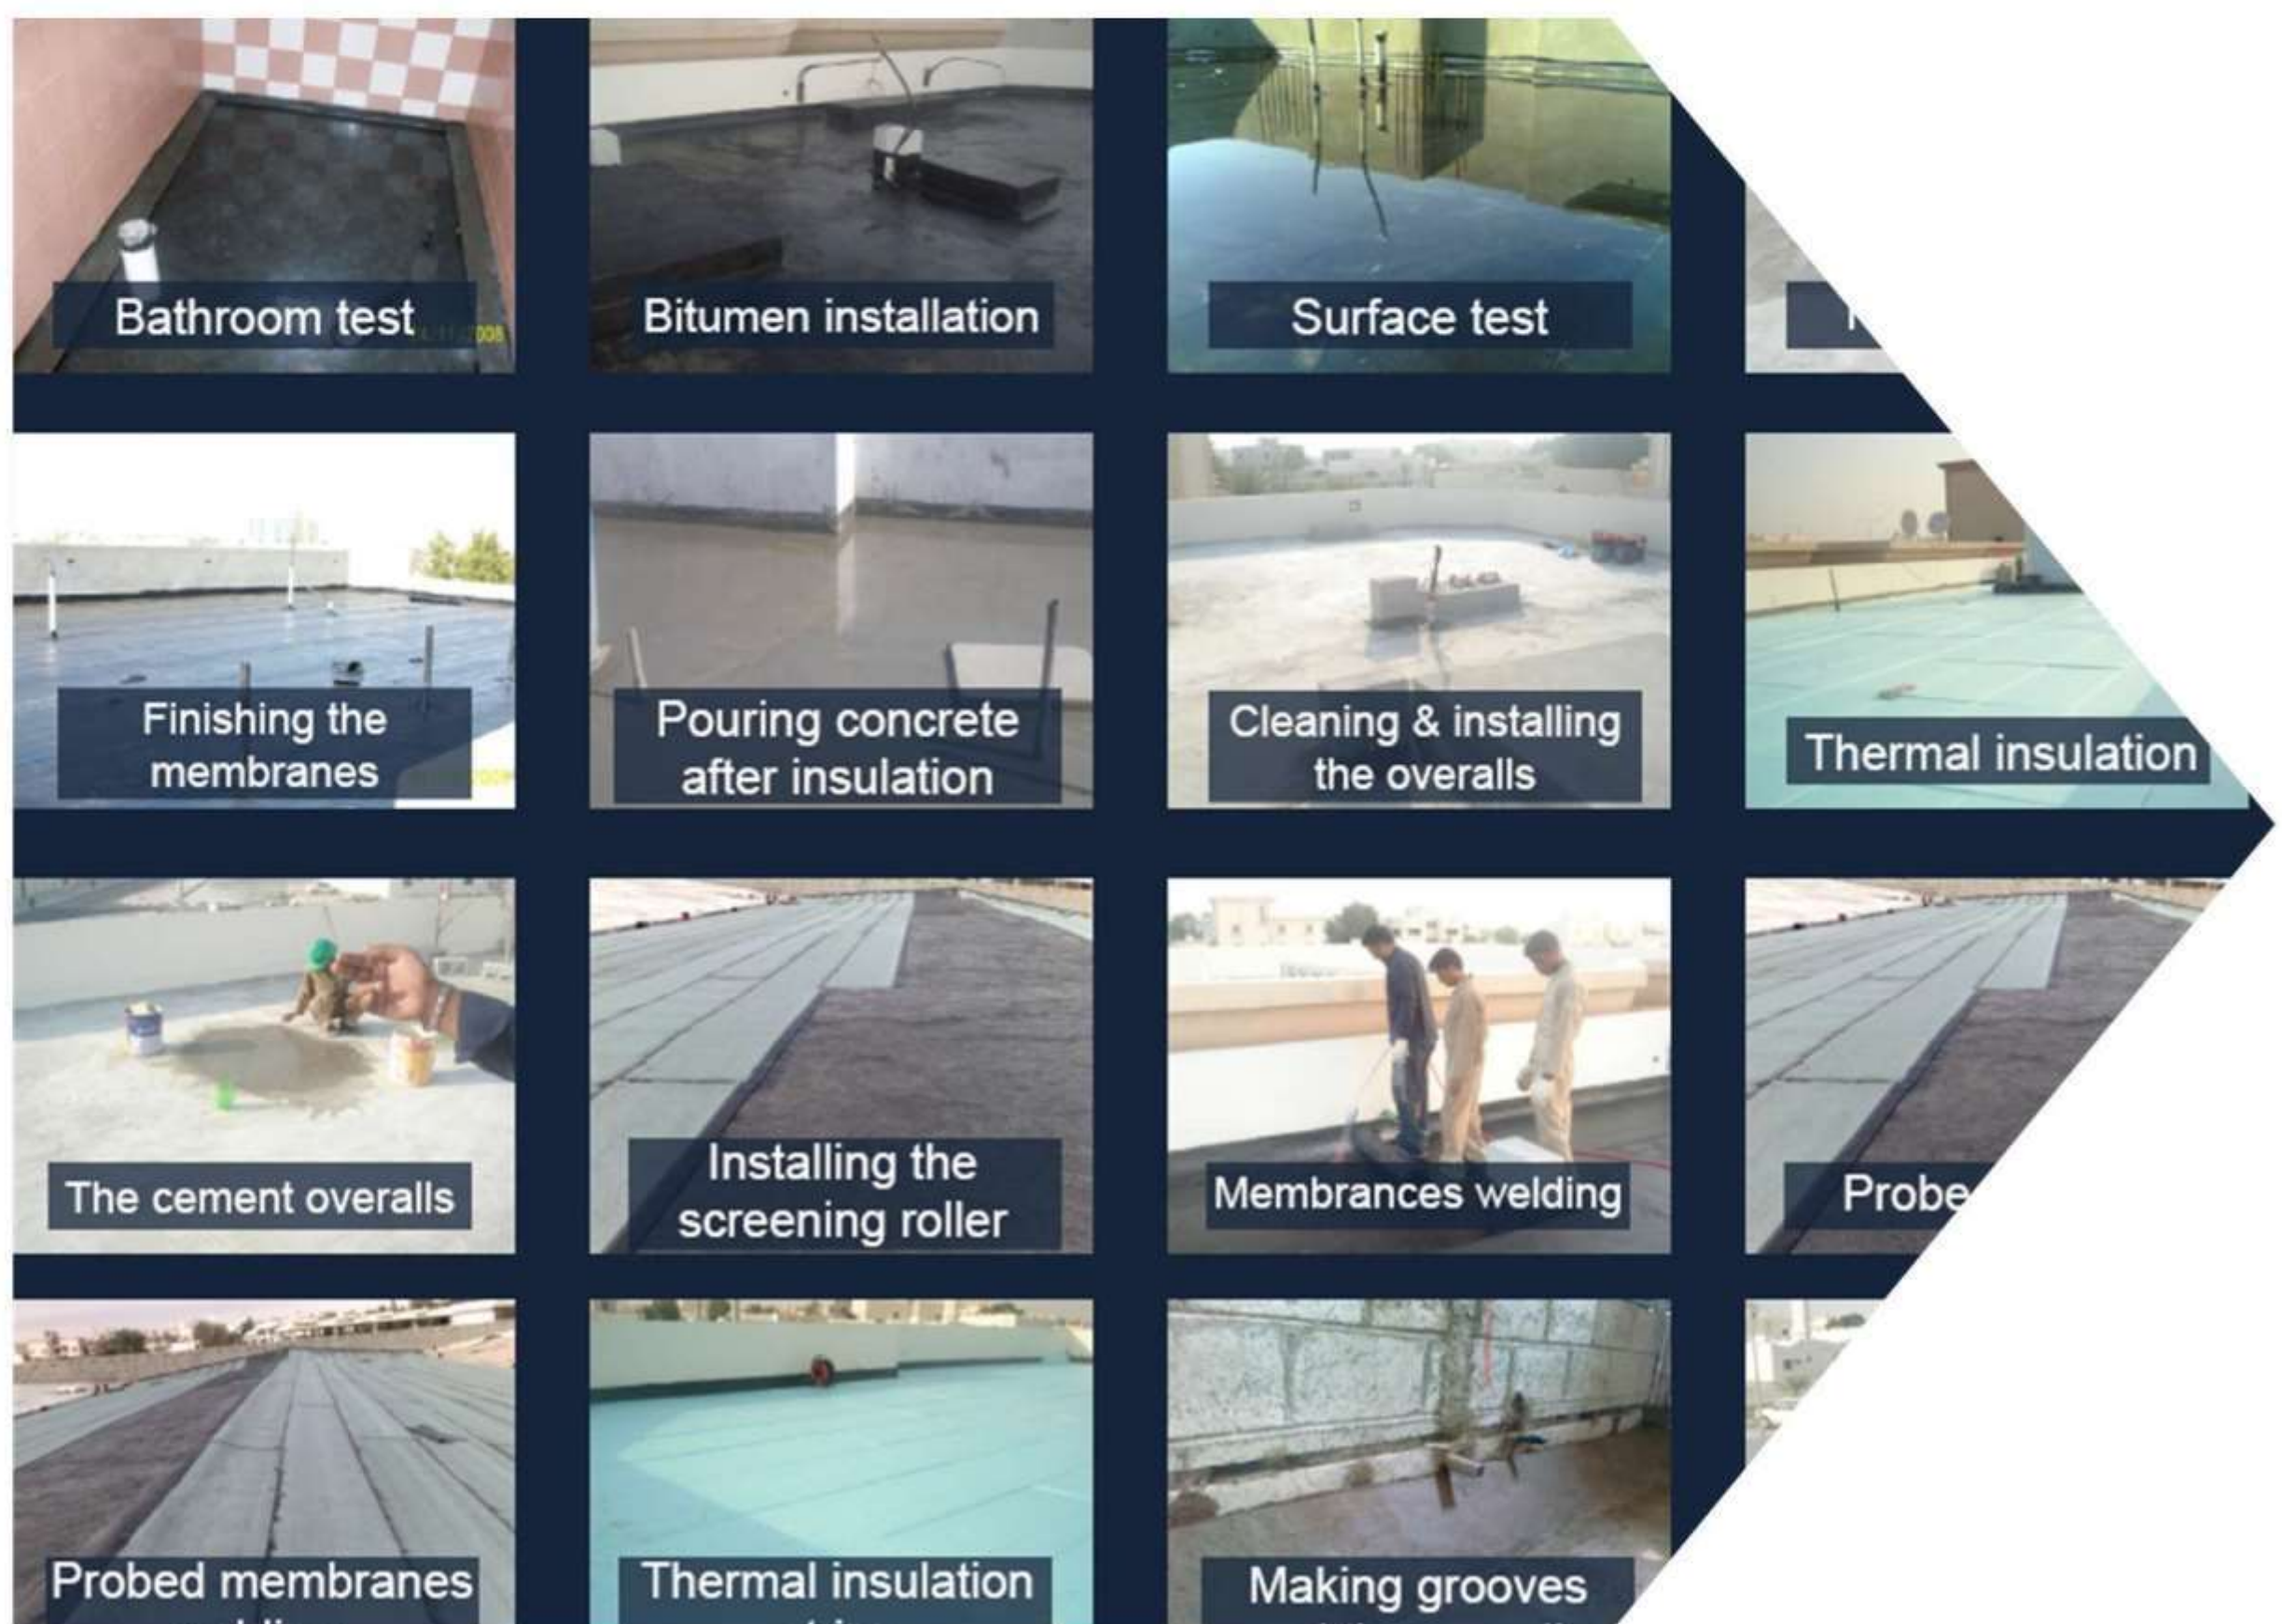

# About the company

"Tadmur Egypt Insulation Company" provides advanced thermal and waterproof insulation solutions for both internal and external applications, aiming to maximize comfort and efficiency for our customers.

Our highly trained engineers and skilled workforce stay updated with insulation advancements, employing advanced scientific methods to deliver tailored solutions that precisely meet our customers' needs.

"Tadmur Egypt Insulation Company" is proud of its rich history of success in the field of insulation and commits to continuing to provide high-quality services to our customers, contributing to creating comfortable and environmentally friendly indoor environments.

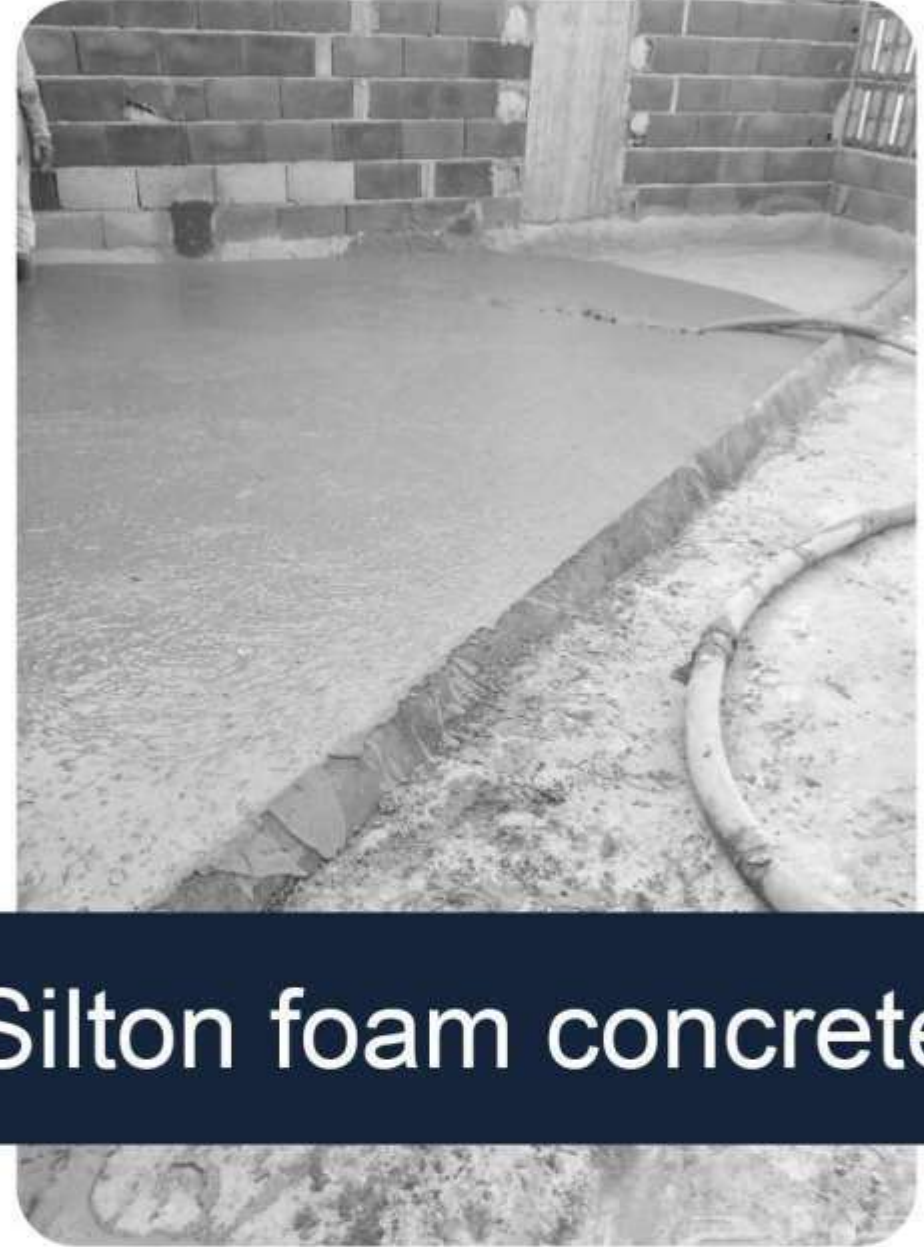

# Thermal insulation

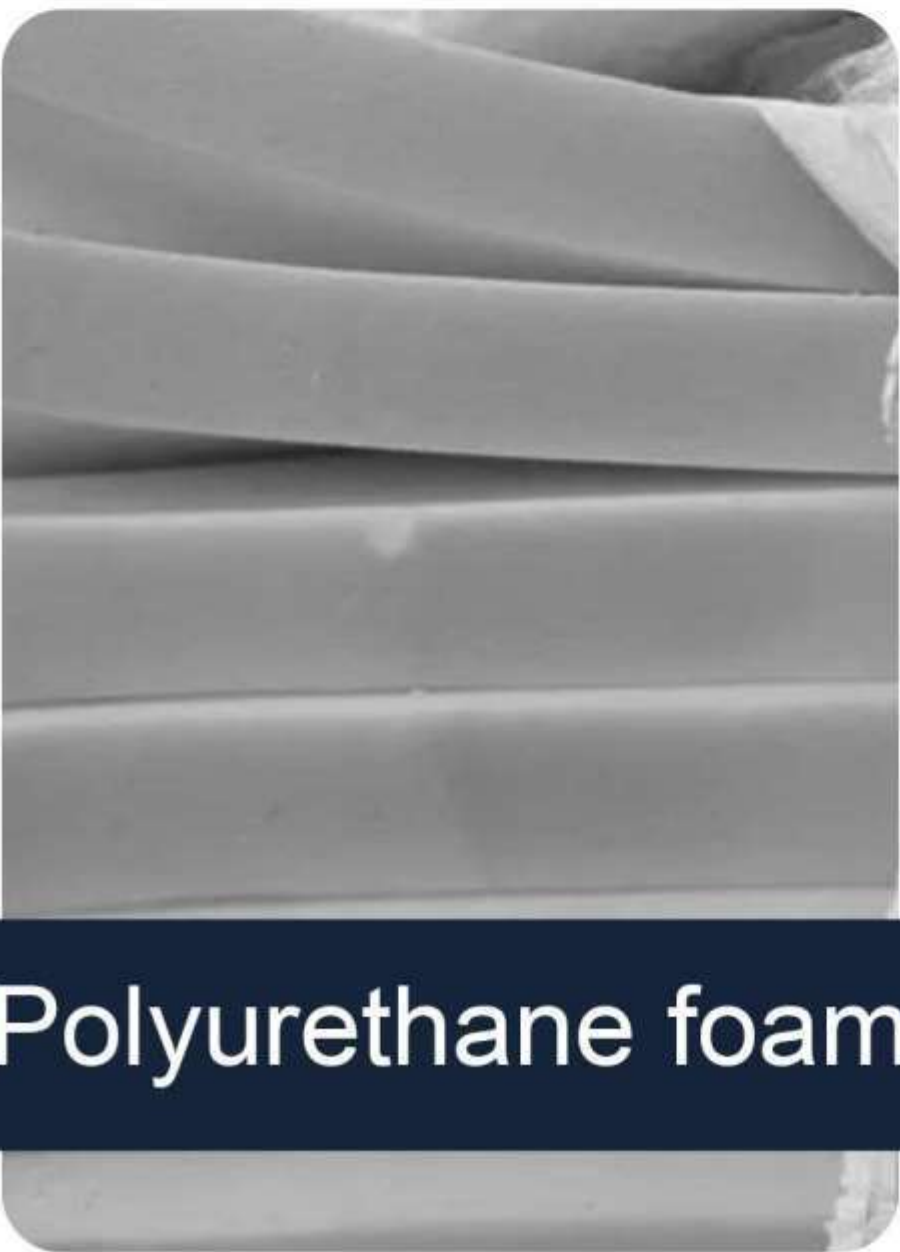

Thermal insulation involves materials or systems that reduce heat transfer between spaces, maintaining desired temperatures in buildings or isolated areas. It's vital for thermal comfort, energy efficiency, and is used in walls, ceilings, floors, windows, and doors. In construction, it enhances energy efficiency, cuts costs, and improves comfort and quality of life.

White styrofoam foam

Silton foam concrete

Polyurethane foam

The foam panel

# Waterproof systems

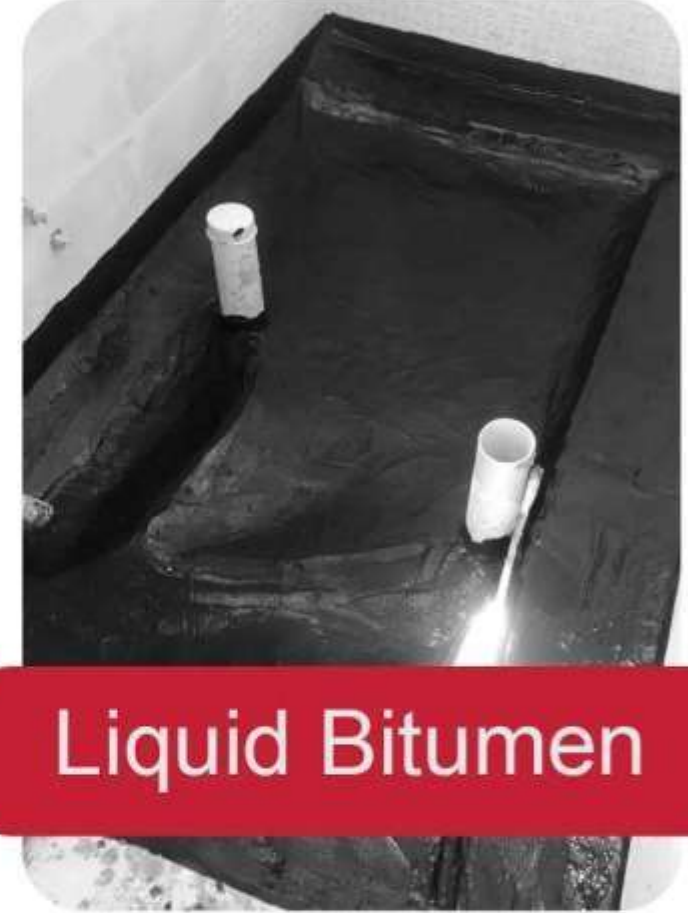

"Waterproof insulation" prevents water infiltration in structures like buildings, surfaces, foundations, and pipes, ensuring long-term safety and quality. It uses water-resistant materials and methods, crucial for averting damage, health hazards, and environmental problems. This lowers maintenance costs due to leaks.

Bituminous Membrane

Liquid Bitumen

Epoxy insulation

Cement insulation

Acrylic Flex

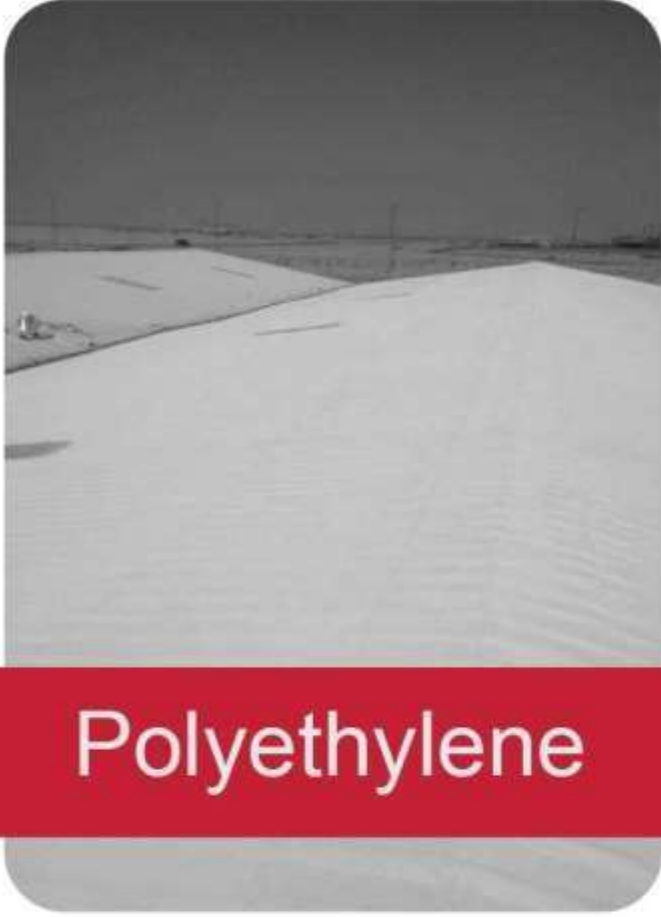

Polyurethane foam

# Protection layers

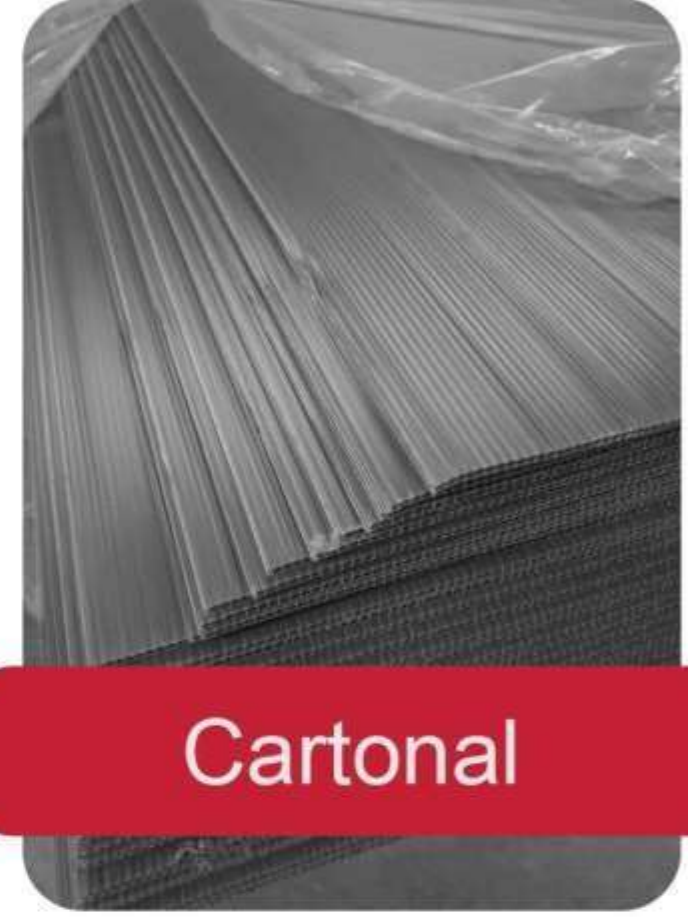

"Protective insulation layers" are additional layers applied to insulating systems to safeguard buildings from damage and corrosion. They use resilient materials and membranes to preserve insulation effectiveness and structural integrity.

Polyethylene

Geotextiles

Cartonal
